Sizing Guides

Gloves

A proper fit is extremely important. An uncomfortable fit causes hand fatigue and ultimately could lead to a potential workplace hazard.

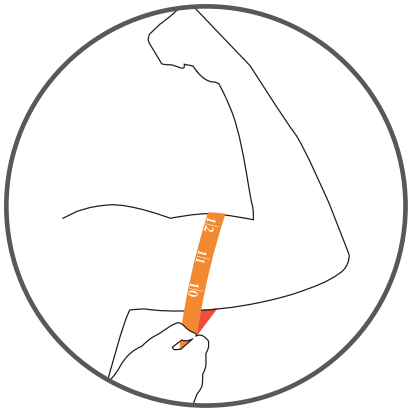

Measure the width of your hand 1 inch below the base of your first finger and across your knuckles.

5 / 2XS	2.75 inches / 68 mm	10 / XL	4.5 inches / 113 mm
6 / XS	3 inches / 76 mm	11 / 2XL	4.75 inches / 123 mm
7 / S	3.25 inches / 84 mm	12 / 3XL	5.25 inches / 134 mm
8 / M	3.75 inches / 94 mm	13 / 4XL	5.5 inches / 140 mm
9 / L	4 inches / 105 mm		

Sleeves

To find the best fit, measure the circumference of your bicep and choose the corresponding sleeve size according to the chart below.

2XS	9.75 inches / 250 mm	L	11.5 inches / 295 mm
XS	10.25 inches / 260 mm	XL	12.25 inches / 310 mm
S	10.5 inches / 270 mm	2XL	12.75 inches / 325 mm
M	11 inches / 280 mm		

Sleeves are available in multiple lengths.

For a more natural fit, some sleeves come in a tapered version which provide better comfort. Tapered sleeves are designed to fit the contours of your arm and won't lose shape due to stretching

(Tapered)

(Tubular)

Quick Fit Tips

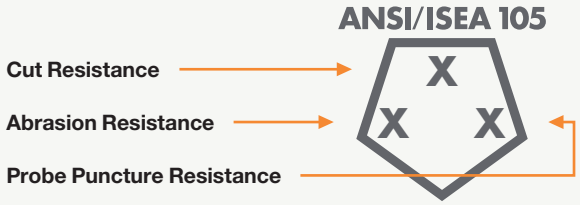

A good fit is important for comfort and protection. Our measurements offer a starting point, but personal preference is key.

Clothing should fit comfortably without excessive bunching when moving. It shouldn't be too loose or too tight as that can affect the safety performance.
